

Case Study: CoreView™ Review Environment Provides Accelerated Review

A document review team was charged with reviewing a mid-size employment matter with an aggressive timeline. This project served as the first engagement between the review team and elumicor.

minimal training

Elumicor assigned a Senior Project Manager to the project. The Project Manager provided a 20 minute training session on CoreView™, elumicor's review tool, to the team.

efficient interface

The review team was then able to review and efficiently tag just over 16,000 documents (123,000 pages) in two and a half days.

corporate partnerships

This employment matter took place in 2008 and elumicor has since then established a close working-relationship with the review team, helping them accelerate their review while maintaining accuracy and defensibility.

case metrics

Review Team = 6 CoreView™ Users

Documents to Review = 16,000

Hours of Review = 22.5

Documents Reviewed/Hour = 711

Documents Reviewed/Hour/User = 118.5
